MAQS™ *imizing Economic Return!*

**Remember: It takes 3 weeks
to Raise a Baby bee!**

For Honey: Maximize healthy colony populations by treating with MAQS™ 4 to 6 weeks before honey flow. Have a super on.

For Overwintering: Treat at end of honey flow while the last super is still on.

Before Splitting: Treat 3 to 4 weeks before.

Temperature: Under 33°C (92°F) for the first 3 days

Ventilation: Full width of Hive, min ½ inch
